

# All-digital Visual Intercom Indoor Unit

7 inch touch screen

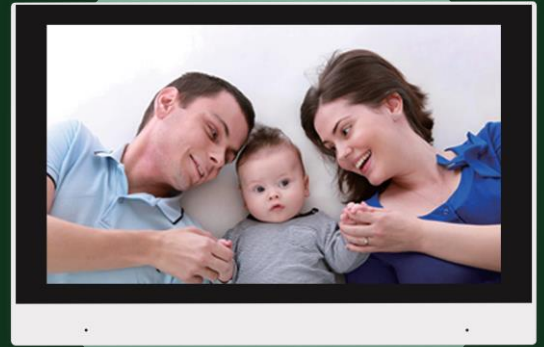

Video intercom

One key to open  
the door

HD pixels

## Product Description

The industry's leading digital visual intercom indoor unit based on embedded Linux system uses a 7-inch color full touch screen to support local intercom and cloud visual intercom. Cloud intercom function can be achieved through WIFI or Ethernet, without the need for separate networking and wiring with the doorway machine.

## Features

- 1) Ultra-narrow frame design, high-grade atmosphere, simple and fashionable.
- 2) 7-inch HD full touch screen, easy to operate.
- 3) Clear sound quality.
- 4) Visual intercom, one button door opening, easy to use.
- 5) Supports emergency one-click alarm, management center call, two-way conversation support
- 6) Supports real-time viewing of surveillance video.
- 7) Simple installation and maintenance, convenient debugging and automatic software upgrade.

## Cloud video intercom

Support APP access, and cooperate with APP to realize cloud intercom function; when someone presses the doorbell, the indoor unit and mobile phone ring at the same time, and video and voice calls can be made.
